REMARKS/ARGUMENTS

Claim remarks with regards to Double Patenting

The Examiner has rejected claims 1-8 and 15-24 under the doctrine of obviousness-type double patenting with respect to U.S. Patent 6,677,856. The Examiner has also rejected claims 9-14 under the judicially created doctrine of double patenting with respect to the same patent.

Applicant has amended claims 1, 9 and 19 to include subject matter originally disclosed but not claimed. Claims 15-18 relating to the transmitter have been canceled. Claims 1, 9 and 19 that comprise receiver related elements have been amended to claim "wake up" subject matter. Support for the subject matter as claimed is found in at least paragraphs 0091 through 0097. As all remaining claims depend upon these independent claims, it is believed that the current claims are novel and unobvious over the original claims and all prior art of record and as such the original rejection is no longer applicable.

CONCLUSION

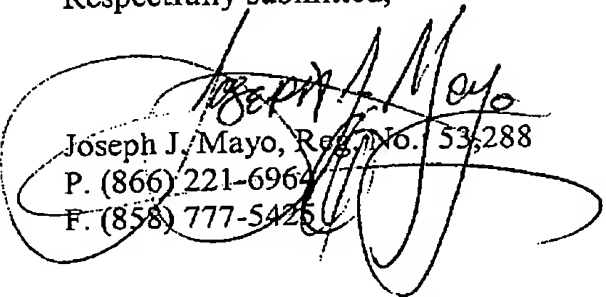

For at least the reasons stated herein, Applicant respectfully submits that the claims as amended are in condition for allowance. If the Examiner differs in this conclusion, the Examiner is hereby requested to contact Applicant's representative for purposes of a telephone interview at the number listed below before any action (other than an allowance) is initiated.
